

# BIOL 1051 in Costa Rica, Spring 2024

General Biology Laboratory will be offered as a **field-intensive in Costa Rica** during **Spring Break**, 2024  
(instead of weekly lab meetings)

Students will be introduced to principles of ecology and evolution through the remarkable biodiversity of Costa Rica forests, at **La Selva Biological Station**, and coral reefs, at **Cahuita** on the Caribbean coast.

To make travel study accessible, we have worked to minimize costs—at **less than \$2000 total**, this will be one of ECU's least expensive study abroad programs. Pre-trip online activities will cover additional biology topics. Generous scholarships are available—be sure to apply!

*Travel: March 3-10.*  
Apply ASAP through link to left.  
Course will fill fast!

Prof. McKinnon:  
[mckinnonj@ecu.edu](mailto:mckinnonj@ecu.edu)  
(**subject Costa Rica**)

*Also available as Biol  
1201 for **majors** and **Biol 3504**—ask!*
